

Jeremy Sandifer

Jeremy currently serves as a STEM Program Coordinator at Kentucky State University where he facilitates experiential research and learning opportunities between students and scientist across all STEM topic areas, including GIS. Other current pursuits involve leveraging open source geospatial data and methods for the empowerment of citizen scientists, serving as trainer and mentor for introductory geospatial technology students, and creating additional opportunities for students to engage in the real life application of STEM content and information. He is actively seeking individual scientist and STEM professionals with an interest in participating in community engagement and outreach projects.
